

An toan thong tin_ Nhóm 10

Nhà của tôi / Các khoá học của tôi / INSE330380_22_1_10 / Test 1. Begin: 21h, thứ 5 - ngày 13/10/2022 / Test 1: Chapter 3 - Chapter 6

Câu hỏi 11

Câu trả lời đã được lưu

Đạt điểm 1,00

Given the security levels TOP SECRET, SECRET, CONFIDENTIAL, and UNCLASSIFIED (ordered from highest to lowest), and the categories A, B, and C, specify what type of access (read, write, or both) is allowed in situation: "John, cleared for (SECRET, {A, C}), wants to access a document classified (SECRET, {B})". Which true statement?

Select one:

- ☒ a. John cannot write and cannot read
- ☐ b. John cannot read and can write
- ☐ c. John can read and cannot write
- ☐ d. John can read and can write

B not in {A,C}
=> two not same type

The subject is always the entity that receives information about or data from the object. The subject is also the entity that alters information about or data stored within the object. The object is always the entity that provides or hosts the information or data. A subject can be a user, a program, a process, a file, a computer, a database, and so on. The roles of subject and object can switch as two entities, such as a program and a database or a process and a file, communicate to accomplish a task.

Which of the following is true?

- ☐ a. A single entity can never change roles between subject and object.
- ☐ b. A subject is always a user account.
- ☒ c. The subject is always the entity that receives information about or data from the object.
- ☐ d. The subject is always the entity that provides or hosts the information or data.
